Human Architecture ONE
665 Broadway, Suite 629
New York, NY 10012

August 13, 2009

Dear Human Architecture ONE,

“Walkway Over the Hudson” is a New York State Quadricentennial Legacy project and the opening of the project is one of this historic years signature events. The many collaborative New York State agencies including the New York State Hudson-Fulton-Champlain Quadricentennial Office have determined that we cannot include outside performances of any kind due to several reasons.

The performances / entertainment for the weekend of Oct. 2-4, 2009 has had to be scaled down and limited to only the modest events that are wholly participatory by the surrounding Hudson Valley communities.

There has been no fault or error on the part of Human Architecture ONE. Due to the current fiscal climate of the state, the New York State Hudson-Fulton-Champlain Office that works closely with the Deputy Secretary for the Environment for New York State Governor David Paterson, the NYS Department of Environmental Conservation and the Office of Parks, Recreation and Historic Preservation had to alter the Opening Ceremonies surrounding the Walkway over the Hudson.

Jeanne Fleming, the Walkway event coordinator has demonstrated the extraordinary and high artistic value that your performance would bring to the Hudson Valley. Our office believes in the beauty of this art and the success of this project.

We hope this enables you to bring this unique and beautiful spectacle to a New York City venue where you will have rapt audiences. We are working to assist in the prospect of Human Architecture ONE to be a part of the Opening of the Brooklyn Bridge Park in 2010. In addition, our office will do everything we can to assist in making connections for you with the organizers of the New York City Quadricentennial events.

Sincerely yours,

Tara Sullivan
Executive Director
